

# **Unit V Summary - Human Conduct & Professional Ethics**

## **Summary Key Points**

1. Ethical Human Conduct is rooted in definitiveness, harmony, and right understanding.
2. Human values are universal and guide desires, thoughts, and expectations.
3. Harmony in the self leads to happiness, health, mutual prosperity, and co-existence.
4. Ethical conduct includes understanding values, expressing them in policy, and living them through character.
5. Professional ethics should align with the comprehensive human goal and societal responsibility.
6. Holistic development includes humanistic education, ethical production, and eco-friendly technologies.
7. The vision includes a universal human order rooted in harmony and sustainable living.

## **Important Points**

- Definitiveness of human conduct and role of natural acceptance.
- Relationship between self, body, behavior, and work.
- Right understanding guides ethical human conduct.
- Policy as the thought process for living by values.
- Character is reflected through compassionate behavior and work.
- Impact of ethical living at individual, family, societal, and natural levels.
- Role of profession as a medium for participating in the larger human goal.
- Issues and solutions in current professional ethics scenarios.

## **Probable Long Questions with Answers**

Q1. What is Ethical Human Conduct? Explain its basis and implications.

Ans: Ethical Human Conduct is conduct that aligns with the natural acceptance and right understanding of harmony in existence. It is self-satisfying, people-friendly, and eco-friendly. It includes values (what to do), policies (how to do), and character (expression in behavior and work). Its implications are observed at all levels - individual, family, society, and nature.

## **Unit V Summary - Human Conduct & Professional Ethics**

Q2. Discuss the vision of Holistic Development and Universal Human Order.

Ans: Holistic development aims at an undivided society and universal human order. This vision encompasses humanistic education, self-regulation, eco-friendly technologies, justice, and decentralized, sustainable living. It integrates all human activities from family to global level in harmony.

Q3. What are the salient features and current issues in Professional Ethics?

Ans: Features include clarity about human goals, competence in behavior, eco-friendly interaction, and societal responsibility. Current issues involve corruption, misuse of authority, unethical business practices, etc. The root problem is a flawed worldview focused on wealth maximization. Solutions lie in transforming consciousness through right understanding.

Q4. Explain the criteria for evaluating holistic technologies and management models.

Ans: Criteria include user-friendliness, eco-friendliness, compatibility with natural cycles, low cost, and decentralization. Management models should be participative, motivational, and value-adding, with a focus on collective wellbeing rather than profit maximization.
